ELMO Forms

- Installation and configuration
- Shortcode [elmo_form]
- Thank-you page

Installation and configuration

The plugin embeds ELMO signup forms on WordPress/WooCommerce sites. Version 1.0.0, files: `cszd-forms.php`, `cszd-mail.php`, `cszd-support.php`.

Installation

1. Upload the plugin directory to `wp-content/plugins/`.
2. Activate it under *Plugins → Installed Plugins*.
3. Go to *Settings → ELMO Forms*.

Configuration

Field	Description
Base URL	Address of your ELMO instance, e.g. `https://elmo.piotrlitwa.com`. Stored without a trailing slash.
API Key	Key from the ELMO panel, format `cszd_xxxxxxxx…`.

Without both values the forms will not render.

Shortcode [elmo_form]

Basic usage — `uuid` is the only required attribute:

```
[elmo_form uuid="your-uuid"]
```

Without `uuid` the plugin renders a red error message instead of the form.

Attributes

Attribute	Default	Description
`uuid`	—	**Required.** Form identifier in ELMO.
`height`	`400`	Height in pixels.
`width`	`100%`	Width — pixels or percentage.
`mode`	`iframe`	`iframe` or `native`.
`title`	empty	Overrides the title coming from ELMO.
`subtitle`	empty	Overrides the subtitle coming from ELMO.

Example

```
[elmo_form uuid="a1b2c3" mode="native" height="520" title="Sign up"]
```

Besides the shortcode, the plugin provides a widget and a Gutenberg block.

Thank-you page

A separate form appended to the WooCommerce thank-you page — typically a newsletter signup in exchange for a coupon. Configured under *Settings* → *ELMO Forms*.

Option	Default
`elmo_forms_thankyou_uuid`	empty — **without it the section will not appear**
`elmo_forms_thankyou_title`	"Dolacz do newslettera!"
`elmo_forms_thankyou_subtitle`	"Odbierz kupon rabatowy na nastepne zakupy."

Title and subtitle override whatever comes from ELMO.
